

Decon Pools are ideal for the collection of hazardous runoff associated with fuel tank leaks, truck wheel washing, HAZMAT applications, decontamination and more.

Decontamination pool tanks are manufactured with durable coated fabrics and is equipped with a foam collar that **rises as liquid enters the tank**. Because they are easy to set up, transport and to store, these secondary containment tanks are perfect for first responders.

Quick and ready in emergency situations, the decon pools are self rising and **no assembly is needed**. If you need to stay in compliance with EPA Spill Containment regulations, this tank makes your job easy and economical.

Optional:

- To ensure a **long life span**, a ground cloth for added protection against rocky and rough outside environments is recommended.
- To make sure that precipitation doesn't have access to the contaminated liquid, a cover can be manufactured that seals the liquid in the tank.
- These decon pools can be built to custom capacities and heights.

Decontamination Pool - Technical Specifications:

Types: Foam collar decontamination pool tank with self supporting sides.

Options: Carrying case.

Fabric Selection:

- 18 oz vinyl
- 22 oz vinyl
- 30 oz XRS
