

Drive Through Berms - w/ Foam Wall Ends

Spill Fast Berm™ Foam Wall Berms are the perfect drive through berm. Built in a low profile design and between 2" to 8" in height, these spill berms come as mini berms or up to 10,000 square feet plus.

If you are looking for a drive thru berm that **can be driven over repeatedly without damaging** the foam, then this berm model is the right one for you!

This berm type can also be used for equipment maintenance and portable drum containment if a fast response is necessary to stay in compliance.

Benefits:

- Perfect if rapid response is needed
- Easy to set up within minutes
- Space Saver - can be rolled up to store behind truck seat
- Holds surface and floors free from contamination
- Quick Deployment through less parts
- Cost effective

Applications:

- First Responders
- Truck Stations
- Factory Plants
- Construction Sites
