Drive-Through Berms w/Aluminum Angles Brackets

Spill Stop Berm™ [Drive-Through Berm with Aluminum Angles Side Brackets](#) and foam ends is compact and durable, and made from XR-5 8130.

They are designed to withstand demanding secondary containment needs including oil, chemicals, and other materials hazardous to the environment.

These drive thru berms are a perfect **high capacity option** for first spill responders!

- Flexible construction with drive in/ drive out ability. The ends rise as the liquid level rises in the berm thus containing any spill.
- **Track mats** are available to help guide vehicles safely into the berm.

Consider our optional **ground mats** for added protection against rough and rocky terrain.

Track mats are available to help guide vehicles safely into the berm.

Custom sizes available upon request.
