

Portable Drug Disposal Incinerator Drug Terminator

This Portable Drug Incinerator works to make your disposal of confiscated drugs **safe, easy & hassle-free**. The Drug Terminator features a **portable design** that allows it to be easily moved in and out of storage for a smooth disposal process. Designed with a **reliable, smoke-free & easy-to-operate system** this incinerator is the easiest way to dispose of your drugs.

This Drug Terminator is used by

- Police Force
- Customs Officials
- Agricultural Inspectors
- Drug Enforcement Administration
- Disaster & Emergency Services
- National Security
- Military Training

How the Drug Terminator Works

- Start the incineration process by firing the unit up with wood or charcoal.
- Drugs can then be placed in fire through the **EZ Feed System**
- Once started, electric blowers work to create intense heat inside the drum.
- This heat **destroys contents** inside swiftly and effectively.
- After items have been destroyed, the remaining ash inside the unit will be, on average, about **1% the total volume** of the amount you placed inside.
