

Inflatable Boat Fenders

Boat and Dock Bumpers

Finally, a boat fender that protects the length of your hull. GEI Works boat bumpers are used on military and law enforcement patrol boats to prevent damage during routine stops. They are also used to protect hulls when transferring supplies and personnel. Boat bumpers can protect rental watercraft from damage caused by day-in and day-out use, and yachts or other private boat owners can use them to protect their boat from docks.

Inflatable Boat Fenders

Boat and Dock Bumpers

GEI Works inflatable boat fenders protect along the length of a boat's hull instead of the spot protection offered by standard fenders. They're also conveniently inflatable and can fold up for easy storage when not inflated.

Applications

- Protect your hull while hip-towing
- Raft with other boats
- Replace your standard fenders
- Protect rental boats and jetskis from damage due to renters coming in to dock
- Bolster your protection in a wet slip or marina during tropical storms and hurricanes.
- Use while docking at unfamiliar docks or during hazardous conditions
- Protect law enforcement and military patrol boats during patrol stops

Features

Each boat bumper is built from marine-grade PVC and comes with a cover, adjustable nylon webbing, and is rated for heavy duty and extended applications.

Installation

The boat fender is easily filled by any inflatable mattress hand pump or electric pump. Simply fill the fender with air, place it along the side of the boat or dock, and adjust the side-release buckles for desired placement. The fender can be deflated and folded for storage.

Inflatable Boat Fenders
