## DOT Approved Water Transport

Argo

### Complete Water Transport Solutions

The Argo Water Trailer delivers water around your job site, farm, residence or other remote locations for dust control, agricultural use, or where water access is limited. This product is fully D.O.T. compliant for use on public roadways. Powered by a 4 hp gasoline engine, the 2" pump gives you flexibility in controlling the force and range of the water flow. Ports include rear spray nozzles for blanketing large areas, while side valves can be used with the fire hose (included) or a garden hose for spot application.

### Features

- **Easy to Use Fire Hose** - The 25' fire hose couples to the fire hose valve on either side of the trailer.
- **Accessible Mounted Tool Box for Storage** - Hoses and/or accessories can be stored in the lockable toolbox provided, which is mounted to the deck of the trailer.
- **Discharge Options** - A hose bibb is located on the discharge manifold and is useful for discharging water to concrete saws and other low volume applications.
- **Simple Water Fill-Up Options** - The poly leg tank on the GEI Works Argo Water trailer can be filled using three methods (filling manually, drawing water through the quick-fill fitting, or drawing water through the pump). Attachable filter is also included for water intake from ponds and other water sources.
- **Precise Valve Utilization** - The valve can be utilized for both quick-fill and pump section methods for filling the tank. 2 inch pump with 4 horsepower Honda engine (or equivalent) and suction and discharge manifold with a flow rate of up to 121 GPM.
- **Accessible/Portable Mounted Instructions** - Valve control instructions are mounted on the front deck of the Argo Water Trailer for ease of use during operations.
- **Wide Coverage** - The galvanized spray bar covers a maximum swath of 25' (feet). Common uses include controlling dust roads and parking lots, compacting roads and building sites.
