

# Dewatering Socks

## Go With The Flow

The [Taurus Dewatering Filter Sock](#) is an effective way to filter water runoff as it leaves the site. Designed to attach directly to the end of vertical pipes or hoses, these socks contain sediment and debris as it discharges from the site. This helps to keep runoff clean, preventing pollution.

Pipe Socks are built in diameters of either 8", 12" or 16" to accommodate various pipes and hoses. All pipe socks are secured to the connection hose via clamps, allowing them to work with multiple sized diameters. Custom sizes are also available.

# Taurus Dewatering Socks

## Go With The Flow

Also known as a Pipe Sock, the [Taurus Dewatering Sock](#) is used for filtering discharge or runoff. The sock filters out sediment, oil and pollution. These filtering socks are made from a non-woven geotextile fabric that is needle-punched to allow only clean water to flow out. Dewatering Socks help with compliance of local and federal regulations.

### Dewatering Sock Features

- Fabric: Nonwoven Geotextile Material
- Standard Diameters: 8", 12" and 16"
- Standard Length: 60"
- Custom Sizing Available

### Dewatering Sock Benefits

- Filters Out Silt and Sediment
- Attaches Directly to a Discharge Hose or Pipe
- Fits Multiple Pipe/Hose Diameters
- Installs Quickly and Easily
- Easy to Ship and Store on Site
- Helps Sites Stay in Compliance with Stormwater Regulations

### Stay in Compliance!

- Helps Sites Comply with NPDES, 40 CFR 122.26 (1999)
- Filters Sediment out of Stormwater
- Can be Implemented as a SWPPP Solution
- This Filter Sock is a Stormwater BMP
