# Oil Fence Boom

The Oil Fence Boom is designed for fast deployment and compact storage around your facility, port, dock or harbor. Often placed around boom reels or folded inside containers, these booms are able to be quickly transported and set up after a spill. All booms are manufactured from a robust 22 oz. PVC material and marine grade components that are equipped to handle continuous use in water and around spills.

## Advantages

- Perfect for Boom Reels
- Flat Foam for Stacking or Folding
- Easy to Transport and Deploy
- Compact Storage Around Facilities
- Quick Response During Emergencies

### Typical Boom Specifications

Model	Freeboard	Depth	Ballast Chain
12" Boom	6"	6"	1/4"
19" Boom	6"	12"	1/4"
24" Boom	8"	16"	5/16"
36" Boom	12"	24"	5/16"

**Section Lengths:** 25', 50' or 100'.

**Top Cable:** If your boom is being used in a moving water area, top cables can be placed on top of the boom for added strength and support.
